SUB-STATE PRESS RELEASE

For Immediate Release March 29, 2022

Unemployment rate continues declining in February for Nevada

CARSON CITY, NV - The state's seasonally adjusted unemployment rate was 5.1 percent in February 2022, a decrease of 0.1 percent from January 2022 according to the Nevada Department of Employment, Training and Rehabilitation's (<u>DETR</u>) February 2022 economic report. Seasonally adjusted estimates account for regularly seen economic patterns, with the following estimates not seasonally adjusted.

In the three Metropolitan Statistical Areas (MSA), the highest unemployment rate was 5.3 percent in the Las Vegas area, and the lowest was 2.8 percent in Reno. Carson area's unemployment rate was 3.2 percent in the month of February 2022.

As for Nevada's counties, the lowest unemployment rate was in Eureka County at 1.8 percent, with Clark County having the highest rate at 5.3 percent. For a look at the unemployment rate in your county, visit our <u>Area Profiles Page</u>.

For the latest information on the Nevada economy including employment, unemployment, and unemployment insurance check out our monthly <u>Labor Market Overview</u>, or to see the data on your area, take a look at our monthly <u>Local Area Labor Market Overview</u>.

Additional information on unemployment estimates along with a complete breakout of unemployment in counties, cities, and other areas in Nevada can be found by visiting our <u>Local Area Unemployment Statistics</u> page. Additionally, employment estimates by industry can be found at our <u>Current Employment Statistics</u> page.

###

ABOUT THE RESEARCH AND ANALYSIS BUREAU:

The <u>Research and Analysis Bureau</u> is Nevada's premier source for labor market information. A part of DETR, the Bureau is responsible for creating, analyzing, and reporting Nevada's labor market information, in cooperation with the United States Bureau of Labor Statistics (BLS).

Nevada Local Area Labor Market Overview

February 2022

Published on March 29, 2022

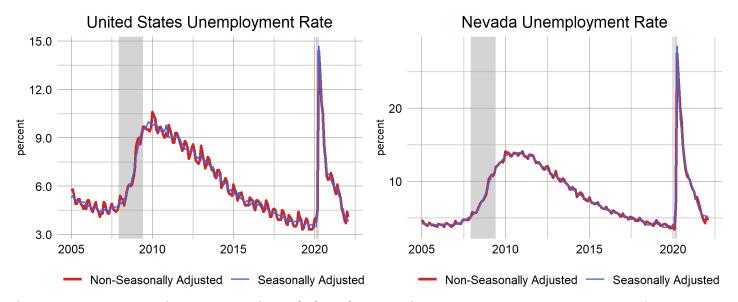

The state had a seasonally adjusted unemployment rate of 5.1 percent in February, down 0.1 from the previous month and a substantial improvement over the 9.8 percent in February of 2021. The non-seasonally adjusted rate for the state was 4.7 percent, down from 5.2 percent in January. Continuing to look at non-seasonally adjusted data, we see that the unemployment rate in Clark County dropped by 0.5, ending at a rate of 5.3 percent. Las Vegas in specific saw a decrease of 0.4 percent, down to 5.4 percent from 5.9 percent. The Carson City and Reno-Sparks MSAs (Metropolitan Statistical Areas) also saw decreases, with both seeing their unemployment rate drop by 0.4 percent (down to 3.2 percent and 2.8 percent respectively). In fact, almost every area in the state saw decreases in unemployment rate. The only exception was Mesquite, which saw an unemployment rate increase of 0.1 percent from 4.0 to 4.1. It is important to note, however, that this local data is not seasonally adjusted and therefore is subject to seasonality.

Figures for state unemployment estimates come from the Local Area Unemployment Statistics (LAUS) program, a state/federal partnership sponsored by the Bureau of Labor Statistics (BLS-LAUS). This program produces monthly and annual employment, unemployment, and labor force data for census regions, states, counties, metropolitan areas, and many large cities, based on place of residence. For more on LAUS data or for a look at estimates in your area, visit our <u>LAUS Page</u>, and for a look at the economic profile of Nevada, the metropolitan areas, or your county visit our <u>Area Profiles Page</u>.

Seasonally adjusted estimates account for regularly seen seasonal employment patterns such as jobs associated with holiday hiring, holiday and weather seasons, or other jobs with seasonal components. The result of a seasonally adjusted estimate is usually a smoother estimate from which underlying economic trends can be seen. Adjusted estimates are in the summary table above, and in many of the other tables and figures throughout this document.

Nevada's seasonally adjusted unemployment rate was 5.1 percent in February 2022, decreasing from 5.2 percent in January 2022, and down from 9.8 percent in February 2021. The number of unemployed individuals decreased by 857 since January 2022 for a current level of 76,194 people, which is 72,763 less unemployed people than February 2021. The labor force in Nevada is currently 1,498,275 people, which is 4,366 more people than January 2022, and is down 24,231 people since February 2021.

The Las Vegas Metropolitan Statistical Area's (MSA)s unemployment rate was 5.3 percent in February 2022, decreasing from 5.8 percent in January 2022, and down from 9.2 percent in February 2021, non-seasonally adjusted. The number of unemployed individuals decreased by 5,580 since January 2022 for a current level of 58,993 people, which is 44,213 less unemployed people than February 2021. The labor force in Las Vegas is currently 1,107,216 people, which is 1,203 less people than January 2022, and is down 13,467 people since February 2021.

Unemployment Insurance Benefits

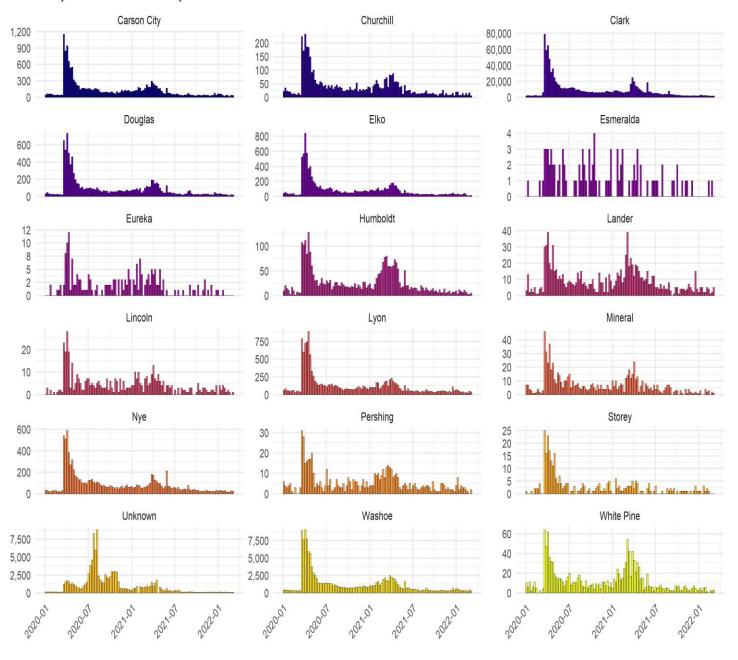

In February 2022, 8,155 initial claims for unemployment insurance were filed in Nevada, a decrease of 4,493 claims, or 35.3 percent, from January when there were 12,608 claims. Additionally, February 2022 had the lowest continued claim average (18K) in the month of February since 1990. As the labor market and hiring remain strong in the state, the number of claimants continues to fall. Also, claimants who received UI benefits at or near the end of the CARES Act would have exhausted their benefits this month. Currently, both initial and continued claim levels are below pre-pandemic levels and have seemed to pick up the downward trend right where they left off in early 2020. February's continued claim numbers are the lowest they've averaged since the 1990's. Looking forward, continued claim levels should level off or decline slightly, as many of those continuing to claim benefits are the ones likely experiencing the greatest challenges re-entering the labor force.

The statewide decrease in continued claims over-the-year can be attributed to the large decreases realized in Clark and Washoe counties. Continued claim levels have seen typical seasonal fluctuations throughout the recent month. However, while continued claim numbers have appeared to level off, the number of claimants will likely continue to decline as more constituents re-enter the labor market.

Within the states' 17 counties, initial claim levels were relatively stable, moderately increasing or decreasing over each report week this month. For the last report week in February, Clark's initial claims decreased by 503 claims from the last report week in January, the largest decline seen in all counties. Furthermore, continued claim levels continued a downward trend in the state's three metro areas. For the report week ending February 26, 2022, Clark (-2,497), Washoe (-267), and Carson City (-43) all realized a reduction in continued claim levels from the last report week in January (January 29, 2022).

To provide perspective on where total continued claim levels stand in the state's largest counties, in the last report week's end in the month (February 26, 2022), the respective totals were as follows; Clark: 13,038, Washoe: 1,983, and Carson City: 246. From January, Washoe, Clark, and Carson City all decreased their continued claim levels.

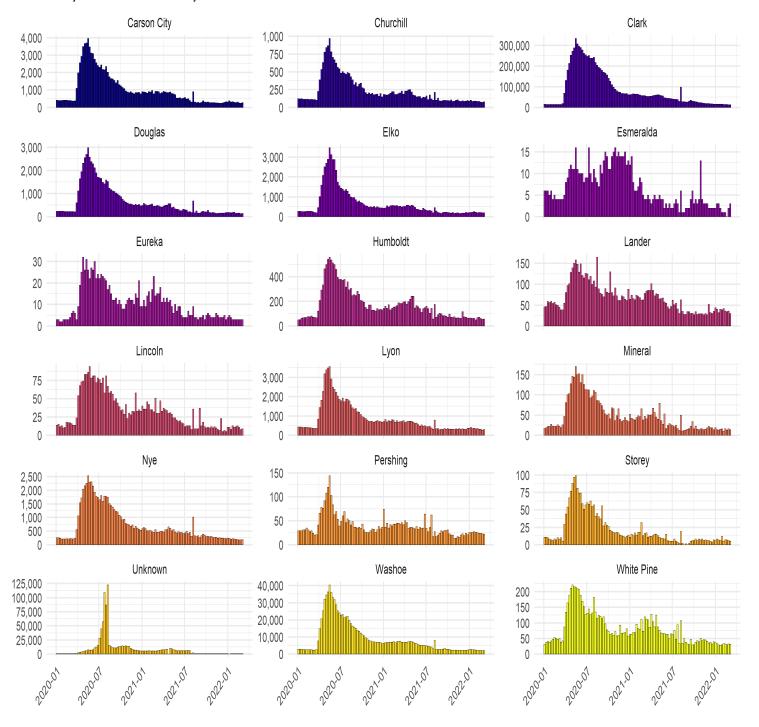

Initial Claims by County weekly claim totals since January 2020

Source: DETR Internal Reporting

Continued Claims by County

weekly claim totals since January 2020

Source: DETR Internal Reporting Figure 11

Looking to other measures of unemployment insurance activity, most counties' final payments decreased from last month aside from Eureka, Humboldt, and White Pine counties. Clark County realized the largest decrease (-665) in final payments over the month. First payments also decreased in most counties since January 2022. Clark and Washoe counties decreased first payments by 1,092 and 495, respectively. The large decrease in first and final payments in the state's two largest population centers is reflected in the increasingly low statewide continued claim levels reported in February. Additionally, all but two counties saw a decrease in benefit payments over the month with Clark and Washoe decreasing by over \$5 million combined from last month.

				Activity by County oruary 2022
